PhD programmes

8 programmes in various study fields that include 50 specialties, 4 years, no tuition fee, salary

ut.ee/phd

STUDY FOR LESS

Most international bachelor's and master's programmes offer student places with a tuition waiver. The tuition waiver student places are allocated at the time of admission according to the general admission ranking list.

A tuition waiver student place means that the student does not have to pay the tuition fee if the nominal study load requirement is met. Nominal study load is completed if no more than 6 credits are missing from the 30 ECTS workload per semester. If the student fails to complete sufficient amount of credits per semester, they have to pay for the credits not earned.

There are also programme-specific scholarships available, e.g. IT Academy scholarship (€300/month) for Computer Science and Software Engineering students.

PhD studies

There is no tuition fee for PhD studies. From the 2022/2023 academic year, doctoral student places are mainly offered as state-funded junior research fellow positions with the gross salary of 1720 euros per month.

TRAVEL THE WORLD

Great short-term study opportunities at UT open to students worldwide

A semester or year spent abroad as an exchange student is becoming a regular and an exciting part of university studies. UT offers many English language courses to choose from in different disciplines.

Exchange studies at UT

UT has partnership agreements with universities around the world and is a member of various student exchange networks (Erasmus+, ISEP, AEN etc.). Exchange students receive grants provided under these agreements.

Come to UT as a visiting student

All students are welcome to join UT for a semester or academic year as a self-funded visiting student. You should be currently enrolled at a higher education institution anywhere in the world. You are free to design your own study plan and choose courses from different faculties of UT.

ut.ee/semester

Spend your summer in Estonia

Coming to Estonia for a summer programme is the best way to get to know the country, its traditions

and gain new friends from around the world. UT offers a wide selection of interdisciplinary and subject-specific summer programmes in a variety of fields:

- Social sciences (politics, e-governance, law)
- Computer science
- Software engineering
- Medicine
- Semiotics
- Linguistics
- Estonian language

The summer courses are complemented by a diverse cultural programme that offers a range of fun and engaging cultural activities introducing the university, Tartu and Estonia. The cultural programme also gives participants an opportunity to network in a lively environment.

BE WHO YOU WANT TO BE

Our graduates are competitive in the job market at home and abroad. Over 80% of our current international students consider staying in Estonia after graduation.

Anna Selecka

Latvia
Business Administration

The vibe of the university and the cosiness of the city of Tartu is the perfect environment for starting building your life the way you want it to be. Here I learned to prioritise and find my focus. I met people that would be crucial to my career development. My career in Estonia has been a chain reaction, which started at the University of Tartu and keeps leading me to better and better things.

Christopher Martin

Germany
EU-Russia Studies

UT helped me to extend my analytical competencies and taught me to always have an open mind and heart. Qualified teachers and a large number of international students made my overall experience close to perfect. One day I aspire to become a Resident Director in an Eastern European Country for Friedrich-Ebert-Stiftung HQ in Berlin. EURUS has certainly prepared me well for that.

Wajid Khilji

Pakistan
Software Engineering

Studying at UT was the most astonishing experience of my life. It pushed my career growth and gave me an opportunity to socialise in a multicultural environment. What I appreciate the most is the diversity in studies, culture, activities, and people. I was inspired to see the faculty members eager to improve and elevate the education standards. It made me achieve what I am today - a CTO in a blockchain company.

Theodore Heiser

USA
Computer Science

I had a ton of attention and guidance from my supervisor. I felt that the work we were doing was really state of the art and meaningful for the field of machine learning. The research work and overall curriculum made me a more competent computer scientist in the industry. I was hired by Google to be a software engineer at their Seattle office, so I definitely feel that this master's programme was worth it.

COMFORTABLE STAY AND ENJOYABLE LIFE EXPERIENCE

Campuses

UT is a multi-campus university. While mainly located in Tartu, the university also operates in Tallinn, Narva, Pärnu, and Viljandi. Tartu is famous for its long-standing university traditions and unforgettable spirit of student life. The city is perfect for studies and everything is easily accessible on foot.

tartu.ee

Accommodation

Most international students are accommodated in modern, centrally located residence halls (5 min walk to Tartu's main square, 10 mins to the University main building). The residence halls consist of apartments, each comprising of 2-3 twin bedrooms with a shared kitchen and bathroom.

campus.ee

Cost of Living

Estonia uses the euro as its currency. A student needs approximately €600 per month. A modest budget per month includes (but not limited to):

	€
Accommodation in dormitory	150
Food	300
Lunch daily special in cafes	5-7
Mobile phone	10+
Transportation Tartu local public transport	Youth (under 26) – 12.95 Regular – 18.5
Fitness club per month	10-50

Visas and residence permits

Practical info

ut.ee/gettingstarted

Student Life

During the semester, international students can take part in various events and trips to get to know Estonia. Students can also travel around Europe and make the most of their time while studying at UT. There are a number of student organisations and clubs that enhance on and off-campus social life.

LIVE IN A DIGITAL COUNTRY

Estonia is located on the north-eastern edge of Europe, bordering Finland, Sweden, Latvia, and Russia.

Due to its location in the Baltic Sea Region, the country has a close cultural connection to the Nordic countries.

Estonia is always referred to as being a very small county; however, in fact, it is larger than Belgium, the Netherlands, Denmark or Switzerland.

Estonia values independent minds

Our society is not hierarchical and everybody can live up to their own potential.

Clean environment and closeness to nature

Estonia has a lot of untouched nature and a low population density. This is very rare in today's world.

Estonia is a Digital Society

It is the first country in the world to vote online and offer e-residency. 99% of public services are available to citizens as e-services.

European Capital of Culture Tartu 2024

Over 1000 events in Tartu and Southern Estonia

Facts about Estonia

Population: 1.3 million

Official language: Estonian, belongs to Finno-Ugric group and is closely related to Finnish

Member of the EU, NATO, Schengen Area, and Eurozone

Known as e-Estonia, the most advanced digital society in the world (Wired)

Home of Skype, Wise and Bolt

According to PISA, a premier global metric for education, the results of Estonian 15-year-olds are the best in Europe.
